Fractional Scaling
May increase power usage, lower speed, or reduce display shar…
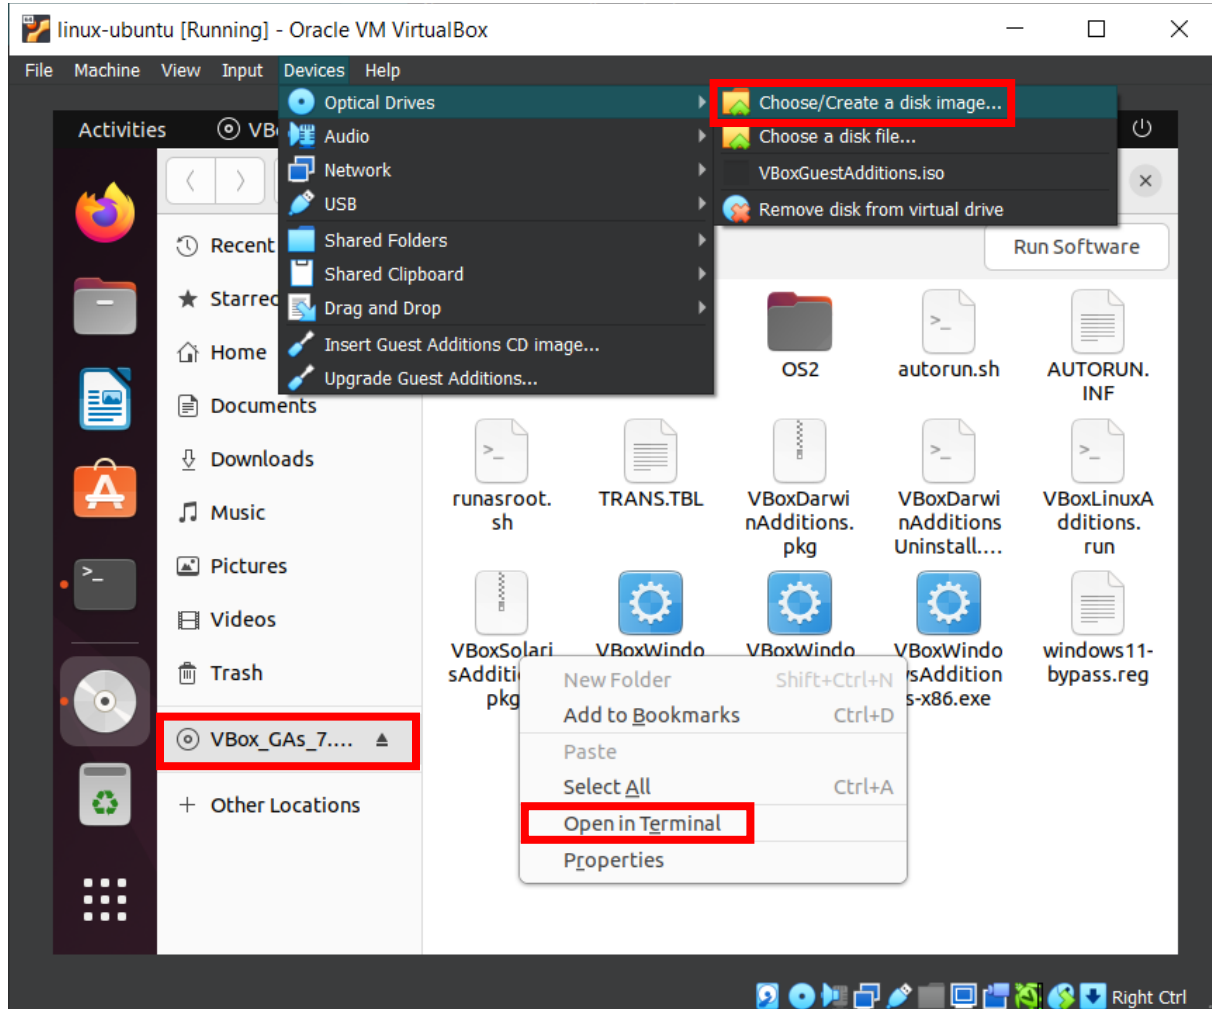

- Press Host + C > Host = Right Ctrl
- Open the Folder of VBoxLinux Additions
- Right Click > Terminal

- Use super user to install
  - add current user to root
    - sudo root
    - su root
    - nano /etc/sudoers
    - user_name ALL =(ALL) ALL
- ./VBoxLinuxAdditions.run

- from windows:
    - Ctrl + C to copy
- from ubuntu
    - Ctrl + Shift + C to copy
- Add Shift in VM

- If these steps above don't work, run these:
    - sudo apt update
    - sudo apt install virtualbox-ext-pack
    - sudo reboot

Then install zsh, zsh-syntax-highlighting, ohmyposh, tldr > check tutorial file
